

3/8/11

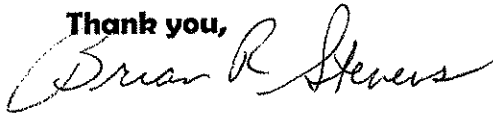

**with the economic climate and jobs outlook here in Connecticut; the picture continues to deteriorate, we as workers we are more at risk than ever before. My paycheck cannot keep up with the increases in fuel for my car to get to work, or the cost of fuel to heat my home; proposed increases in taxes are going to take yet another bite out of the little I have left each pay period.**

**Today I provide my written testimony concerning HB 6446, legislation that can bring more money into the state and properly protect the Connecticut residents as well. The act concerning registration for public service technicians and certified video service providers is really needed.**

**How much money in license fees has been lost? How can this help the State of Connecticut is the question I have asked myself?**

**Your yes for HB 6446 will be a good move for the people of the state. I ask that you vote yes for House Bill 6446.**

**Thank you,**
